WORK EXPERIENCE

Backend Developer
Entoo Logistics

01/2023 - Present   *Bengaluru, Karnataka*

Specialize in providing comprehensive and reliable rider services to e-commerce giants such as Flipkart, Amazon, and others.

Achievements/Tasks

- Develop server-side logic to power the functionality of web applications, ensuring high performance and responsiveness.
- Design and maintain database schemas, optimize queries, and ensure data integrity and security.
- Create and maintain RESTful APIs to facilitate communication between the frontend and backend components of applications.
- Implement authentication and authorization mechanisms to control access to resources and ensure data privacy.
- Identify and address performance bottlenecks in backend systems, including optimizing database queries, caching data, and scaling infrastructure.
- Conduct code reviews to ensure code quality, adherence to best practices, and maintainability. Write unit tests and integration tests to validate backend functionality.
